

2020 year was really terrible for all of us. We couldn't train we couldn't compete and we couldn't travel. Everything was online.

So lot of athletes tried online competitions the first time. IUKL had 2 online competitions. First one was in April. It was just for supporting athletes who were training home.

The second competition was official World Cup with medals and certificates. It was really useful for all athletes and totaly for kettlebell sport.

We hope the next year we will stop virus activities and competing will be possible for all athletes in all countries!
